Software Engineering **(Contract)**

Aug 2023 -Dec 2023

909 CleanUp - Rancho Cucamonga, CA

- Integrate an admin feature to set up appointments, which retrieves data from various back-end(javascript) services and databases.
- Admin/Sales feature that extracts shared data using MongoDB, allowing modification of data in the appointment records.
- Custom UI/UX slides with image transitions, featuring a quote message and a 'Book Now' button.
- Create a custom front-end Login/Sign-up page with encryption features and feedback using JavaScript on the backend and the frontend(HTML)..

- Ensure email templates are optimized for various email clients and devices to guarantee consistent rendering and user experience.

Web Developer (**Contract**)

May,2023-Aug, 2023

EternalsLifts - San Bernardino, CA

- Responsibility of presenting products with a professional touch. I showcased images using a custom CSS layout and implemented a transition effect to smoothly reveal the front and back views of the shirts
- Customized the EternalsLifts logo and homepage banner publishing and graphic software packages using Adobe Photoshop and Illustrator, ensuring that the brand's image was consistent and professional
- Ability to handle highly sensitive materials and situations, including confidential files, while maintaining strict confidentiality and exercising complete discretion, diplomacy, and good judgment.

Software Engineering (Contract)

Feb 2022 - May, 2021

Fonsecas Flowers - San Bernardino, CA

- Developed an e-commerce website that facilitated online flower purchases through transactions, utilizing cutting-edge back-end components such as Node.js, MongoDB, and PayPal
- Meticulously monitored the web application's performance by implementing web reporting and data tracking, expertly utilizing top-of-the-line tools like Google Analytics, Google Tag Manager, Google Data Studio, and Google Search Console.
- implemented an advanced backend feature called the admin page, which enabled smooth and efficient modifications to the store.
- Designed and implemented a Signup/login feature that enabled customers to effortlessly create an account for purchasing products, thereby significantly enhancing the overall user experience.

Software Engineering (Contract)

Oct 2020 - Feb 2021

Genuine Customs & Collision Center - San Bernardino, CA

- Posses a strong skill set in performing interactive debugging and testing and analyzing program failures.
- Proven track record of efficiently managing projects and meeting tight deadlines, while offering support with quick turnaround due to demanding project management requirements.
- Proficiency in operating systems such as Word, Excel, Access, Power Point, Visio, and Microsoft Project,
- Created a fully functional contact form, using HTML for form markup, CSS for styling, optional client-side validation, server-side scripting (e.g., PHP, Python, Node.js) for form processing, backend validation, email handling, a thank-you page or confirmation message, and optional database integration for storing submissions.
- Basic knowledge of applicable university infrastructure, policies, and procedures
- Ability to identify and solve standard problems and refer more complex problems to appropriate staff

Full-stack React Developer (Volunteer)

Jan 2020 - Apr,2018

Droppers - San Bernardino, CA

- Volunteer as a full-stack React developer and lead a team of software engineers to create an e-commerce website for selling clothing and electronics.
- Website was designed with a range of features, including a contact form, profile creation, an admin section, an about page, a store page, and an FAQ section
- Guest checkout process enabled users to add items to their cart, while the cart feature allowed for the easy addition or removal of items using react.js, and node.js

- Login/signup feature allowed both admins and customers to create an account, with admins having the ability to create a temporary password and email it to employees using backend such as react.js,node.js and the a custom html page for the signup/login page.

Extracurricular Activity

Cadet (Volunteer)

Jun, 2014 - Oct, 2021

Redlands Police Department , CA

- Leadership skills are often honed through exercises that involve taking charge of situations, making decisions under pressure, and coordinating actions with fellow recruits. This may include scenarios where recruits must lead a team through tactical situations or manage a crisis effectively.
- Communication skills are emphasized through training modules that cover verbal communication, de-escalation techniques, and effective interaction with the community.
- I underwent instruction on both the legal and moral duties of police officers, stressing the duty to enforce laws impartially and treat all individuals equitably, with integrity assessments conducted through role-playing scenarios and simulations to reinforce the significance of ethical conduct in law enforcement.
